

# TSCM BUG SWEEPING

BUG SWEEPING

*With identification,  
removal, and  
termination of devices  
you no longer need to  
feel exposed to those  
who threaten your  
privacy.*

# OUR SERVICE

**We can protect your privacy from the threat of electronic listening devices and look to identify vulnerabilities in your existing security protocols that would permit such dangers to exist.**

We deploy Technical Surveillance Counter Measures (TSCM) a highly specialised service that is carried out by our expert team of investigators. Electronic devices can be inconspicuous or concealed so require professional inspection to be identified. Our expert systematic physical and electronic examinations of a location or item will discover any electronic listening devices that may be present.

We will work with you to identify areas of concern, completing an initial baseline assessment survey, with a view to more searches being conducted if bugs are found. We can operate sweeps internally and externally at your property as well as on individual items.

Our team is here to support you throughout the process and subsequently advise on necessary security measures to prevent or impede future threats.
