

EVENT SECURITY MANAGEMENT

*Celebrate your
special events safe in
the knowledge that
our team is helping
to protect you and
your guests.*

OUR SERVICE

Our Event Security Management service will provide bespoke security support for your latest event.

We work closely with you and your events team to establish the precise service required to meet your unique security needs. We can scale our operation to the size and requirement of your venue, whether we provide a complete security provision on site or work exclusively on one aspect of your security such as screening at entry, VIP area management, or establishing a central security hub with our transportable command and control centre.

No matter the event service you require, we will work seamlessly alongside any other security resources you may have in place and liaise with external organisations, such as emergency services, as required.

Alongside our team of specialist operators, each with an extensive public service or military background, we have the unique resource of our own event security trailer. The custom-built trailer provides a security hub no matter how remote the location, presents an impressive security presence and incorporates the latest in security systems.

We are unique in our vision for bringing together the security industries leading experts and specialist security services with an unmatched level of customer care and quality standards.
