

INVESTIGATIONS

*Providing reassurance
in times of concern,
investigations will look
to clarify and correct
any underlying
uncertainty you may
have.*

OUR SERVICE

Our specialist investigation division looks to support and assist you with all your investigative needs.

Our investigation services follow a holistic model which delivers to your identified goal, whether that sits under corporate investigation, internal staff investigations, or targeted intelligence gathering. We incorporate both traditional investigative tools and modern data capture techniques where required, to provide a versatile and comprehensive investigation.

Tailored to your requirements, we work closely with you to build up a robust and strategic plan, around your core objective, whether it is personal, public, or business specific. We always take into consideration your unique risk factors and vulnerabilities and adapt our service to best deliver your end goals.

Our investigation team comes with unmatched experience, having established previous careers leading, managing, and delivering some of the UK's most serious organised crime investigations. Our investigative services have been refined to resemble the 4P approach structure deployed by the Serious and Organised Crime Agency, designed to deliver even the most complex outcomes.

4P APPROACH:

- Pursue those who engage in serious and organised criminality
 - Prevent serious and organised crime from being carried out
 - Protect those vulnerable to crime
 - Prepare to reduce the impact of criminality and crimes
