THREAT & RISK ASSESSMENTS

> You don't have to face the threat of a security breach alone, we have the specialist skills to identify, isolate and mitigate potential risks for you.

## OUR SERVICE

## We work with you to reduce the risk of harm, damage, or loss to you, your loved ones, property, assets, business interests, and data.

The threat and risk assessment process will distinguish any key deficiencies that are detracting from your overall security and safety. As the assessment procedure progresses each identified threat or risk is detailed and mitigating actions to resolve these are offered. We only ever make essential recommendations for the benefit of your safety. Creating a cohesive and simultaneous response to your unique security profile.

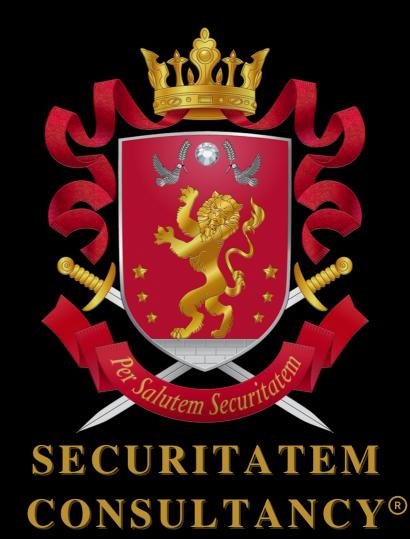

Using best practice principles of Deter, Detect, Delay, Mitigate and Response, we will always adopt a risk management approach that suits your lifestyle, one that integrates security into your routines but does not inhibit them.

The whole process is carried out by specialist security consultants, skilled in managing risk at strategic, operational, and tactical levels. They will be on hand to coordinate intelligence gathering, considerately review your unique profile and liaise with you and your representatives throughout.

## **FURTHER DETAILS:**

- Identify what threats and risks are present
- Confirm which individuals will be affected and how
- Evaluate the risks and decide on precautions and contingencies
- Record the findings of the assessment
- Review and update threats and risks as required
