conclusions you need,
through a targeted
surveillance operation
with us.*

OUR SERVICE

Building a strategic and tactical surveillance response to your unique security aims and objectives.

We offer a range of services including corporate investigations, false Insurance claims, staff integrity surveillance, and private surveillance services. Operations can be managed and run remotely, either directly from one of our covert surveillance vehicles or our fully equipped command & control centre.

We take great care to ensure that evidence is gathered discreetly, with integrity, and compliant with legal processes to an evidential standard.

Our surveillance teams consist of the UK's most experienced former serious organised crime authorising officers who are proficient in active operation and practical evidence gathering, including photos, videos, and written reports. Trained to the highest standard in the industry, they have an impeccable record of successful outcomes nationally and internationally.
